

digiled 5.9mm LED Floor

Outdoor LED Stage

digiled LightSlice, with a pixel pitch of 10mm (WxH), has a unique and compact form-factor, LightSlice offers designers a rugged, midresolution LED product with versatile rigging and mounting options. When designs don't conform to the standard module format of traditional LED screens, LightSlice is the right choice. By varying the spacing between units, designers and content creators can create unique pixel pitches between LightSlice modules.

Control Video offers Light Slice in .5m, 1m, and 1.5m Configurations.
